

## Best Preschool & Enrichment Curriculum With Proven Results

### school with focused educational strategies

To help your child become a critical thinker, stellar reader, and passionate learner all rolled into one, look no further than **Growing Up Gifted**.

**W**hile parents are constantly looking for the best for their children, finding the best (and right) early childhood curriculum can be quite a headache. Different kids possess different levels of learning ability and needs, which is something Growing Up Gifted understands. This is why the school's Founding CEO, Deanne Chong-Duffield, and a team of early childhood professionals have come up with an award-winning range of programmes specially curated for young learners between the ages of six months to eight years. They present a holistic approach that builds essential skills like problem-solving, language, mathematics, logic, literacy, and social skills.

Deanne is a Master of Education and uniquely certified as a Curriculum Specialist in Preschool Gifted Education. What sets Growing Up Gifted's curriculum apart is that it is developed with Gifted Education and

Multiple Intelligences strategies. By nurturing all forms of intelligences, it can help lay the foundation for fulfilling children's potential and realising their unique abilities and gifts. This way, not only can your child benefit from having a solid academic headstart, his or her learning ability can even be propelled to greater heights.

Besides award-winning phonics strategies and specially crafted teaching aids, Growing Up Gifted also makes learning fun and develops a lifelong passion for learning through the use of progressive teaching methods and activities like dramatic play, action rhymes, puppetry, Super Writing skills, creative art, and Orff musical productions. The school is also expanding and looking to bring their exciting programmes nearer to your doorstep, with two new schools in Tampines Junction (opening in January) and Derbyshire Road off Thomson Road (opening in March).
